Area Dental Practice Attends Presentation by Nationally Acclaimed Dentist

**"left to right - J.Zola, A.Deturo, K. Kerak, RDH, C.Palko, Dr.Shandrick, and
Dr. Ron Jackson, Program director, Las Vegas Institute for Adv. Dental Studies(LVI)"**

People today want their dentistry less invasive and more aesthetic. With people living longer and having an increased desire to keep their natural teeth longer, today's dental patients are expecting teeth to be 'restored', and not just filled. The public is demanding that the materials placed on their teeth are safer, stronger, more compatible, and look good. It is no wonder those dark "mercury-silver" fillings typically placed on back teeth are becoming a thing of the past. Remarkable tooth-colored restorations which are kinder, stronger, and look so much better, are the dentistry of today! .

This October, local dentist Dr. Bob Shandrick and his office team members attended a Dentistry Update on these remarkable new dental materials and treatments at Pocono Manor, Mt.Pocono, P A. The headline speaker for the event was world renown authority Dr. Ron Jackson, "F AGD, F AACD, author, dental products developer, and Program Director of Anterior and Posterior Aesthetic Dentistry, at the prestigious Las Vegas Institute of Advanced Dental Studies (LVI) in Nevada.

A graduate of all Dr. Jackson's clinical and lecture courses at LVI, Dr. Shandrick and his team members continually strive to improve and enhance their knowledge on the latest and best materials, techniques, and treatments available in dentistry.

For more information on the amazingly strong and beautiful ways to restore teeth, Contact Shandrick Dental Care Studios, Rt 93, Sugarloaf, (570)-788-1870, at LVI (888)-584-3237, or the websites www.shandrickdentalcare.com or www.LVIdocs.com.
